Generator Annual Maintenance Agreement

Annual maintenance includes changing the engine oil and filter, replace air filter, replace spark plug and tighten electrical connections. The unit will also be run through a test cycle to check for hertz output. Maintenance will be performed during normal business hours, Monday through Friday between 8:00 am and 4:30 pm.

Customers do not have to be home during maintenance. If you would like for us to automatically schedule the next available appointment please check mark the line listed below. Also, please write your email address below if you would like an email confirmation of the appointment.

Any repairs required at the time of inspection shall be billed separately. Equipment serviced by another firm shall not be covered under this policy. Service calls will be billed separately.
